

FC413 BRAND

FC413 is a dependable 4 dormancy product that is very high-yielding under 3 to 5 cut harvest managements. It consistently delivers greater income per acre for dairy, beef, and cash hay producers. FC413's disease resistance package protects your crop from most common pests and diseases. In the field, it's a head turner, while on the dairy, it's a milk producer.

Winter Survival and Adaptation

Fall Dormancy	3.9
Winter Survival	2.0
